Homeowners & commercial building owners seeking a door with a hard-to-find smooth flush, contemporary appearance, that combines sleek style with energy efficiency and proven performance.

Product Details

1. What is the exterior texture & design?

The door has a smooth flush design that is smooth as ice. There is no exterior embossment.

2. What colors are available?

Black and white

3. Are the doors paintable?

Yes, however field painting voids the factory finish warranty. See link for field painting instructions: [Amarr Field Paint Instructions](#).

4. What is the thickness and insulation?

Doors are 1-3/4" (4.5cm) thick with foamed-in-place polyurethane insulation.

5. What is the R-Value of these doors?

13.5

6. What bottom seal and retainer are used?

Bottom panels have an L-shaped aluminum retainer with a black vinyl T-slot weather seal.

7. What Residential windows are available for the EOS?

SlimLine 41" x 7" insulated windows are available in clear, frost, and dark tint in either black or white frames.

8. What Commercial windows are available for the Amarr 2448?

Three commercial black frame windows are available: 24"x8" & 24"x12" insulated tempered, and 26"x13" insulated acrylic.

9. What is the current wind load offering?

IBC wind load certification is available up to 140 MPH through 16'4" widths without windows. Florida Building Code (FBC) certifications are pending and will be official by December 18, 2024.

10. What is the Residential warranty for the EOS ES3134?

Residential doors carry a 25-year finish warranty and a 5-year warranty for both sections/delamination and workmanship/hardware.

11. What is the Commercial warranty for the Amarr 2448?

Commercial doors carry a 10-year finish warranty. The section/delamination warranty is 5-years and the workmanship/hardware warranty is 1-year.

12. How can the doors be cleaned?

Simply wipe down with a cloth and soapy water.
